

ADRIAN CARTIER, PhD

AI & Data Science Executive | Builder of Decision Systems | Board & Advisory Leader

St. Louis, Missouri | adrian.cartierphd@gmail.com | [linkedin.com/in/adriancartierphd](https://www.linkedin.com/in/adriancartierphd)

Transformative AI and data science executive with 20+ years of experience building enterprise-scale decision platforms, commercializing analytics products, and governing AI systems in regulated, high-stakes environments. Proven operator and strategic leader who has delivered \$250M+ in realized business value, led organizations of 40+ professionals across 13 countries, and holds an issued U.S. patent with two additional patents pending. Equally effective as a cofounder, C-suite executive, and board member, with a reputation for pairing deep technical mastery with sound business judgment, disciplined risk management, and long-term value creation.

SIGNATURE STRENGTHS

- ◆ Enterprise AI Strategy
- ◆ Board Governance & Oversight
- ◆ P&L Ownership & Value Creation
- ◆ Org. Design & Talent Development
- ◆ Regulated Industry Compliance
- ◆ M&A Integration & Due Diligence
- ◆ Product Commercialization
- ◆ Stakeholder & Investor Relations
- ◆ Patent Development & IP Strategy

PROFESSIONAL EXPERIENCE

The Hartford | Hartford, CT

May 2025 – Present

Head of AI Accelerator

Lead enterprise-wide acceleration of AI and generative AI capabilities for a Fortune 100 insurer, focusing on reusable platforms, disciplined experimentation, and governance-first deployment.

- ◆ Partner with senior business and technology leaders to translate complex use cases into scalable, compliant, and value-generating AI systems.
- ◆ Establish operating models that balance innovation speed with risk management, model accountability, and long-term maintainability.

Freight Science | St. Louis, MO

May 2025 – Present

Member, Board of Directors

Provide strategic oversight, governance, and executive counsel to an AI-driven optimization company serving the U.S. trucking industry. Advise on long-term strategy, operating model evolution, and decision-automation risk.

Freight Science | St. Louis, MO

June 2020 – May 2025

Co-Founder & Chief Data Officer

Cofounded and built an AI-powered decision-automation platform enabling carriers to optimize tender acceptance, pricing, and network balance across the U.S. trucking industry.

- ◆ Led design, productionization, and governance of proprietary optimization and ML models deployed in live carrier operations, contributing to \$250M+ in delivered value.
- ◆ Oversaw ROI measurement frameworks and executive engagements, driving commercialization of the company's first analytics software product.
- ◆ Advanced an invention disclosure patent process for proprietary algorithms.

PROFESSIONAL EXPERIENCE (CONTINUED)

Ocelot Consulting | St. Louis, MO

June 2020 – June 2024

VP of Data Science | Strategic Advisor

Built the firm's data science practice from the ground up, then transitioned to a strategic advisory role. Guided executive clients on analytics modernization, AI operating models, and capability development.

- ◆ Secured over \$1M in revenue in under one year by building a full-scale data science consultancy model.

Enterprise Holdings | St. Louis, MO

Aug 2019 – June 2020

AVP, Data Science

Established global data science strategy and governance for the world's largest car-rental operator. Mobilized a cross-functional governance committee of senior executives from Revenue Management, Risk, Marketing, and IT.

- ◆ Architected and led the build-out of the company's cloud-native analytics platform in Microsoft Azure, enabling machine learning across trillions of records.

Bayer Crop Science (Monsanto) | St. Louis, MO

June 2012 – Aug 2019

Director & Science Fellow, Data Science and Engineering (2014 – 2019)

Analytics Research Lead, The Climate Corporation (2014)

Sr. Manager of Geospatial Analytics (2013 – 2014)

Strategic Scientist (2012 – 2013)

Progressed from individual contributor to director leading a global organization of 40+ data scientists and engineers. Served as the global supply chain integration lead for data science during the Bayer-Monsanto acquisition.

- ◆ Delivered 16 production digital tools incorporating 100+ data science models across 13 countries, generating \$75M+ in estimated value and 46% IRR.
- ◆ Data Science Fellow: Developed an analytical model delivering over \$200M in cost savings for engineering solutions to reduce land utilization (2018).
- ◆ Managed development and launch of FieldScripts, the company's first customer-facing data science software; led joint research initiative with IBM on precision agriculture.

University of Montevallo | Montevallo, AL

Aug 2008 – June 2012

Assistant Professor of Mathematics

- ◆ Co-created a multidisciplinary Game Design Program; engineered an algorithm yielding a more balanced salary structure for university faculty.

INTELLECTUAL PROPERTY & THOUGHT LEADERSHIP

U.S. Patent Holder — Plant Pickers and Related Methods Associated with Yield Detection (U.S. Patent 2021009200, April 2021). Two additional U.S. patents pending. Keynote speaker to 5,000+ attendees on Digital Fluency, ML and Operations Research, and Supply Chain Digital Transformation. Published author of several academic publications in mathematics and applied data science.

BOARD & ADVISORY SERVICE

- ◆ Board of Directors, Freight Science (May 2025 – Present)
- ◆ Alumni Board, University of Mississippi College of Liberal Arts (2021 – Present)
- ◆ Founder & Principal, Cartier Holdings, LLC

EDUCATION

University of Mississippi, Oxford, MS

Post-Doctorate (2006) | PhD, Mathematics (2006) | M.S., Mathematics (2004) | B.A., Mathematics (2002)
